

# CONFIGURE THE RIGHT UPS IN JUST A FEW CLICKS.

The GTEC UPS Configurator helps you quickly identify the ideal solution and compatible battery configurations based on the required runtime.

## What is the GTEC UPS Configurator?

The GTEC UPS Configurator is the new online tool designed to support distributors, installers, business partners and end customers in selecting UPS solutions.

Thanks to its intuitive filtering system, the tool makes it easy to quickly identify the product that best fits specific application requirements and to view the available battery configuration options.

### What you can do

- ✓ Quickly identify the UPS that best meets your needs.
- ✓ Filter and compare multiple solutions in just a few steps.
- ✓ Calculate the required runtime and view compatible battery configurations.
- ✓ Access technical data, images and product documentation.
- ✓ Download brochures, datasheets and configuration summaries.
- ✓ Share the selected solution with the GTEC team.

### Key benefits

#### Faster selection

Get an initial recommendation quickly and intuitively.

#### Design support

Instantly view possible battery configurations based on the required runtime.

#### All information in one tool

Quickly access technical documentation, images and product details.

#### A simple, guided experience

Easily navigate the full GTEC UPS range through a clear, user-friendly interface.

# How it works in 3 simple steps

## 1. Set the parameters

Select the required features and the main technical filters.

## 2. Identify the UPS solution

Quickly view compatible models and compare the different options available.

## 3. Explore the possible battery configurations

Set the desired runtime and review the available battery configuration options.
